

## ***Shhh ... listen to smooth, quiet power in action!***

The smooth, quiet YT660E is feature-packed for such a compact machine and efficiency is the key to its amazing snow clearing performance. A heavy duty serrated auger breaks into the snow, ready for the fast-spinning impeller to throw the snow fully 14 metres from its electrically adjustable metal chute.

The Hydrostatic Transmission is simple to control in Forward or Reverse and track speed is adjusted by a single lever, without affecting impeller rotation speed or the discharge distance. The high-grip rubber tracks provide solid traction on any terrain.

Powering this compact all-round snow thrower is Yamaha's reliable 4-stroke OHV engine with its convenient electric start.

- ▶ Powerful Yamaha 4-stroke engine and electric start
- ▶ Hydrostatic Transmission (HST) - a joy to drive
- ▶ Powerful 2-stage blower - throws snow 14 metres!
- ▶ Wide (61cm) snow clearing performance
- ▶ Tough rubber track drive - great grip and traction
- ▶ Easy control of chute rotation - electric powered
- ▶ Mechanically adjustable chute angle
- ▶ Heavy duty serrated steel auger - for tough jobs
- ▶ 3-step auger height adjustment system
- ▶ Adjustable 'Snow Jaw' scraper
- ▶ Heavy duty auger gear case - for long service
- ▶ Handy work light on control bar - a bright idea!

## ***Now the snow falls where you want it to!***

Every Yamaha machine, from motorcycle to outboard to snowmobile, is designed and engineered to make your life more relaxing and enjoyable – and in the case of our snow throwers, to turn a chore into a pleasure! For over 30 years, we've been meeting the needs of consumers and professionals by constantly introducing the very latest technologies and innovative features into our line-up.

Now, our snow throwers will cut you wider paths, throw your snow further and more accurately – and do it with a smooth, quiet easy-going efficiency that will surprise and delight you.

So when the snow comes, Yamaha is there to help you move it to where you want it.

### **Yamaha 4-Stroke OHV engine with electric start**

With the YT660E you can simply turn the key, relax and enjoy the smooth, quiet, reassuring power of the efficient and reliable Yamaha 4-stroke OHV engine. This durable, well proven 175cc air cooled unit provides plenty of torque and snow-throwing power, but also delivers excellent fuel economy, running on regular fuel (OCT95).

### **Hydrostatic Transmission (HST)**

Our durable hydrostatic transmission system offers more precise speed control as well as smoother shifts between Forward and Reverse – with the use of a single lever. So you can change speed or stop without disengaging the tracks or affecting the speed of the impeller – or the remarkable distance (up to 14 metres) you are throwing that snow!

### **Powerful dual-stage auger/impeller system**

The dual-stage auger and impeller system is designed to withstand the harshest winter conditions. The heavy-duty steel auger cuts a very wide path (61cm) and has a serrated cutting edge that breaks up even icy, hard-packed snow – ready for the high-speed impeller to propel it through the chute and throw it up to 14 metres away.

### **Tough rubber track drive system**

No slipping, no sliding – just great control. The rubber tracks are pliable, with large cleats for added grip when manoeuvring in difficult conditions. They provide good traction, even on steep driveways – and you can even expect this machine to climb steps when necessary. The system works in perfect harmony with the hydrostatic transmission.

### **Simple adjustment and easy-to-use controls**

Convenience is designed into the YT660E. The rotation of the chute is electrically powered and the chute angle is simply adjusted by a lever on the control bar. The interlock lever for auger and drive engagement only requires one-handed operation, leaving the other hand free to adjust speed or chute position on the fly.

### **Mechanical auger tilt system**

The tough, steel auger of the YT660E has a 3-position mechanical tilt system, including a very helpful 'float' setting that allows the machine to adapt to the snow conditions by following the ground contours. Adjustment is simple and quick, using the conveniently placed foot lever.

### *Engine*

Model	MZ175E
Engine type	Single cylinder, 4-stroke, air-cooled, OHV
Displacement	171cc
Maximum power	4.4 kw ( 6.0 ps )
Starter system	Electric 12VDC battery type (std), manual recoil (with auto decompressor)
Ignition system	TCI
Recommended fuel	Unleaded Regular Gasoline

### *Capacity*

Clearing width	615 mm
Housing height	440 mm
Snow clearing capacity	35 tons/hr
Maximum snow throwing distance	14 m

### *Drive system*

Axle	Rubber track
Transmission system	Hydrostatic
Speeds	Infinitely variable
Ground speed forward	0 - 3.2 km/h
Ground speed reverse	0 - 2.4 km/h

### *Auger system*

Auger type	Dual stage
Diameter	310 mm
Drive	Belt
Height adjustment	Mechanical 3 positions

### *Chute control*

Rotation	Electric
Deflection	Manual (remote lever)
Turning radius	230 °
Chute material	Steel

### *Dimensions*

Fuel tank capacity	4.5 litres
Engine oil capacity	0.6 litres
Wet weight (including full oil and fuel tank)	102 kg
Overall length x width x height	1,464 mm x 615 mm x 1,060 mm

### The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements.

Yamaha Genuine Parts & Accessories are especially developed, designed and tested for our Yamaha product range. Yamaha also recommends the use of Yamalube®, our own range of high-tech lubricants - the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you work or play.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative riding gear designed to keep you comfortable and protected. An extensive range of casual wear is also available. For more information go to:
