

Competition-bred. So there IS no competition.

No trail is too rough or demanding - no bump too big - and no corner too tight for our new SRViper R-TX SE. Put simply, this is a no-compromise machine of unparalleled raw power and handling ability.

Set low in the chassis for stability, the fuel-injected Genesis® High Output engine delivers plenty of the relentless, aggressive power and torque you need to tackle the most challenging and bumpy conditions, on-trail or off. Team that up with a race-bred track, chassis and suspension package designed with the extreme rider in mind ... and enjoy!

And is there room for little luxuries like reverse, electric start, hand/thumb warmers and stylish instruments? Of course!.

- ▶ Genesis® 4-stroke 1049cc High Output engine
- ▶ Advanced fuel injection system for explosive power
- ▶ Legendary Yamaha clutch system - smooth & reliable
- ▶ Slim, light and strong pyramid chassis
- ▶ Asymmetric front suspension - FOX® FLOAT® 3 shocks
- ▶ Dual-shock SR 129 - torsion spring rear suspension
- ▶ 135mm Tuner skis (dual keel)
- ▶ Race-bred Camoplast® Snocross 1.7"/44mm track
- ▶ High performance Hayes braking system
- ▶ Convenient electric start and push-button reverse
- ▶ Dual digital gauges and sleek, sporty windshield
- ▶ Dual-switch grip control for hand & thumb warmers

***Whenever, wherever
the snow falls, team
up with your Yamaha.***

Being out on the trails or powder is one of life's great feelings – creating emotional moments to last long in the memory. So enjoy our snowmobiles. Each one is designed and equipped to deliver supreme handling, performance, comfort, economy and reliability.

It's a winning combination you can depend on from your Yamaha – along with our innovative engineering and electronic control technologies that bring you and your machine closer together as a unit – to create a more satisfying riding experience than ever before.

So wherever you ride – on smooth or rough trails, soft powder or up at high altitudes – choose the perfect partner. Your Yamaha.

Genesis 4-stroke 1049cc High Output engine

While this dynamic powerplant delivers massive low-end power and torque, its lightweight crank and advanced fuel injection system also deliver instant throttle response across the RPM band. Adding to its capability are features like the oil pressure sensing system and the remarkable Engine Braking Reduction System (E.B.R.S.).

SRV chassis - low weight with high strength

The SRViper chassis design features an aluminium construction with a load-bearing, triangulated design that helps keep weight low and strength high. The result is razor-sharp agility and a superbly balanced ride, with the dynamics to complement a huge variety of riding styles.

Suspension designed for stable handling

Race inspired front suspension geometry is a characteristic of the SRViper models. The R-TX SE has FOX® FLOAT® 3 shocks, which deliver ultra-responsive front-end handling. The suspension set-up will give you great confidence, keeping the machine flat and stable when riding trails at high speed, but making corners a real pleasure.

Adjustable dual-shock SR 129 rear suspension

Along with the SRViper R-TX SE comes an impressive range of adjustable pressure and tuning options - and no tools are required, so you can easily make quick adjustments out on the trail, to suit the conditions. With its dual aluminium HPG shocks - and torsion spring suspension, this is a trail rider's dream machine.

Camoplast® Snocross® 1.7"/44mm track

Renowned for dependable performance, the race-derived Camoplast® Snocross track on the R-TX SE features 1.7"/44mm lugs. The track is driven by extrovert drive sprockets which mesh precisely with holes in the track, acting like a gear mechanism to deliver outstanding levels of grip and propulsion, particularly off trail or in deep snow.

Ergonomic seat design - for control and comfort on the trails

The high-density trail seat of this SR Viper offers excellent grip - for control over the agile chassis - and is very comfortable, with plenty of room to move freely around the seat during those fast, exhilarating trail rides. The SRViper R-TX SE is also equipped with a handy belt holder.

Engine	
Type / Displacement	4 Stroke / 1,049cc
Cylinders	3-Cylinder
Cooling	liquid-cooled
Bore x stroke	82.0 mm x 66.2 mm
Carburation	41 mm Mikuni x 3, Fuel Injection, Liquid Heated
Intake design	2-valves
Ignition system	Digital T.C.I. w/T.P.S.
Exhaust	2-valves, Rear Exhaust
Clutch / transmission	YVXC, Variable Ratio, Electronic Shift Reverse, Magnesium Chaincase & Cover
Disc brake system	Radial Master Cylinder Hydraulic Brake / Disc on Drive Shaft

Suspension	
Front suspension system	SRV
Front shocks	FOX® FLOAT® 3
Front travel	254 mm
Rear suspension system	Dual Shock SR 129
Rear shocks	C43 R13 aluminium H.P.G. / C53 R13 aluminium H.P.G.
Rear Travel	343 mm

Measures / Dimensions	
Overall height	1,180 mm
Overall length	2,997 mm
Overall width	1,219 mm
Track W x L x H	15 inch x 129 inch x 1.7 inch, 381 mm x 3,277 mm x 43 mm
Track Type	Camoplast Snocross 1.7"
Ski stance (ctr. to ctr.)	1,067 -1,092 mm adjustable
Fuel tank capacity	37.0 litres

Features	
Electric start	Standard
Reverse	Standard
Hand & thumb warmers	Standard
Headlight watts, type	60/55W H4 Halogen
DC output	Standard

Snowmobiles are built to operate within their design limits. For durability, reliability, but most important of all, operator safety, under no circumstances should the recommended capacities identified in the owner's manual be exceeded. Consult your snowmobile dealer when selecting a snowmobile for your particular needs.

Always wear a helmet, eye protection and protective clothing. Always ride responsibly and within your limitations, respecting the environment as well as country and local laws. The riders depicted are professionals: don't attempt to emulate them. The specifications, measurements and appearance of Yamaha products will be varied from time to time without notice, and as shown here are illustrative only and are not a contractual description of products. Some models are shown with optional accessories.
